Experience

Senior Front End Developer, Leafly — August 2019 - Present
Engineering lead for content CMS news directory. Oversaw and contributed to a full scale rebuild of CMS in Wordpress. I also contribute heavily to home page and strain directories using React, Next.js, Webpack, Node and Directus for content management. Major focus on performant web pages focusing on Core Web Vitals.

Senior Front End Developer, Spreetail — January 2019 - July 2019
Myself along with 30 other engineers launched a full service eCommerce site in only 4 months. Served as engineering lead for CMS using Strapi, which included a blog, marketing content and enhanced product content. I also converted our existing SCSS styles to styled components and created a robust image sizing solution with Imgix.

Front End Developer, Tastemade — July 2016 - December 2018
Working directly with content creators and designers, I helped create a unique, interactive experience Tastemade's flagship web site. I implemented several user-centric optimizations including saving recipes and subscribing to the company's premium offering.

Front End Developer, GPO — September 2015 - June 2016
Responsible for front end implementation of responsive, large scale, local search pages for companies such as Domino's, Bridgestone, Maggianos and Cort Furniture. Heavy focus on SEO.

Web Developer, Mutual Mobile — July 2012 - September 2015
Worked on a wide variety of web apps and responsive sites with clients like Zynga, Greenway, AGCO and MySask. Optimized and maintained company website, created email templates and new internal and external facing tools for the marketing department.

Education

Ohio University — 2008 - 2012
