Experience

Senior Front End Developer, Spreetail — January 2019 - July 2019
In a span of just 4 months, I helped engineer a full-fledged e-commerce site. I served as chief developer of our CMS using Strapi, which included a blog, marketing content and enhanced product content. I also converted our existing SCSS styles to styled components and created a robust image sizing solution with the help of Imgix.

Front End Developer, Tastemade — July 2016 - December 2018
Working directly with content creators and designers, I helped create a unique, interactive experience on www.tastemade.com. I implemented several user-centric optimizations including saving recipes and subscribing to the company's premium offering. I also worked on various other projects including a Shopify store with custom template, Apple TV and Roku apps and XML and JSON feed creation.

Front End Developer, GPO — September 2015 - June 2016
Responsible for front end implementation of responsive, large scale, local search pages for large companies such as Domino's, Bridgestone, Maggianos and Cort Furniture. Heavy focus on SEO.

Web Developer, Mutual Mobile — July 2012 - September 2015
Worked on a wide variety of web apps and responsive sites with clients like Zynga, Greenway, AGCO and MySask. Optimized and maintained company website, created email templates and new internal and external facing tools for the marketing department.
